TEAMING IN PRIMARY COACHING

Learn about employing a Primary Coach approach when serving on teams that support families.

Individuals who are not Kansas residents should contact dunnandpopcoaching.com for information about accessing the lessons.

ABOUT THE MODULES

Each e-learning module reviews the policies and evidence about the topic and then provides case material and worksheets to apply the policies and evidence to practice situations. Learners develop competency based knowledge and skills as they work through the module activities. Each module contains a pre and post-test as a planning tool for the learner. All worksheets are downloadable so learners can use them to practice with families in their actual case load, and meet with their supervisors to advance their professional development. By completing activities, passing the short quiz and obtaining a supervisor's signature, the module will count as 5 contact hours. The module takes about one hour to view and the associated worksheets take approximately 4 hours to complete.
